PROMPT WARS 2026 × SRM ACM STUDENT CHAPTER

FairShift: Decent Work Platform

Building fairer, safer, and more transparent workplaces for employee-intensive organisations.

Theme: UN SDG 8 — Decent Work and Economic Growth

THE PROBLEM CONTEXT

Manual Workforce Management

Large workforces still rely on paper registers, spreadsheets, and WhatsApp groups across key sectors:

Construction

Daily shift workers on active sites.

Colleges & Schools

Campus support and facility staff.

Hospitals

Round-the-clock care and sanitation teams.

Factories

High-volume floor and line operators.

WORKER PAIN POINTS

Why Workers Struggle Today

- **Opaque Pay Calculations:** Unclear salary breakdowns or uncounted overtime hours.
- **Fear of Identification:** Hesitation to raise complaints or share honest feedback.
- **Unreported Safety Risks:** Workplace hazards ignored until actual injuries occur.
- **Lost Career History:** Unrecorded skills force workers to restart from zero.

SYSTEMIC GAPS

Employer Blind Spots & User Needs

For Employers

Zero Workforce Visibility: No clear view of overworked or unhappy staff.

High Attrition Risk: Unable to spot employees likely to quit early.

Delayed Escalation: Issues reach management only after becoming severe.

Accessibility Needs

Regional Languages: Workers primarily communicate in native local tongues.

Limited Literacy: Interfaces must support voice and visual cues.

Basic Smartphones: Must run smoothly on low-end mobile devices.

THE MISSION

Your Hackathon Challenge

Make work fairer, safer, and more transparent for everyone.

Empower workers with clarity and voice while giving employers actionable insights into workforce health.

CROSS-INDUSTRY REQUIREMENT

2+ Sectors

Your platform must work across at least two distinct industries (e.g., Construction Site + College).

EXAMPLE FEATURES (1 OF 2)

Transparency & Safety Tools

1. Shift Tracking

QR or location check-in with automatic overtime.

2. Clear Payslips

Simple salary breakdown in worker's native language.

3. Safety Reporting

Voice or text hazard reports with status tracking.

4. Honest Feedback

Anonymous reviews on managers and working conditions.

EXAMPLE FEATURES (2 OF 2)

Growth, Wellbeing & Insights

5. Skill Passport

Portable digital record of training and experience.

6. Fatigue Alerts

Flags excessive hours or back-to-back shifts.

7. Admin Dashboard

Tracks attendance trends, complaints, and quit risks.

8. Voice & Local

Multilingual voice support for low-end smartphones.

DELIVERABLES

What You Need to Submit

3+

Working Features

Functional prototype (custom ideas welcome).

2 UIs

Dual Interfaces

One for workers, one for employers/admins.

2+

Industry Use Cases

Short explanation of cross-sector adoption.

EVALUATION RUBRIC

How Projects Will Be Judged

Judging Criterion	Core Focus Area
1. Real-World Impact	Tangible improvement to worker safety and employer visibility
2. Relevance to SDG 8	Direct alignment with Decent Work and Economic Growth
3. Inclusivity & Ease of Use	Accessible for regional languages, low literacy, and basic phones
4. Technical Implementation	Clean code quality, security, and working dual interfaces
5. Feasibility & Scalability	Practical adoption across two or more distinct industries

HACKING WINDOW BEGINS

All the Best, Innovators!

Understand the problem, plan your dual-interface architecture, and build for real-world impact.
